

David Mandado Loureiro

Eindhoven, Netherlands | david.manda.loureiro@gmail.com | +34 604026586

Data Science and Computer Science student with experience across MLOps, applied machine learning, analytics, and consulting. Focused on building deployable ML systems, reliable pipelines, and decision-support tools.

EXPERIENCE

MLOps Engineer | mih360

Apr 2026 - Present | Eindhoven, Netherlands | Hybrid

- Architected and automated CI/CD pipelines for machine learning, moving models from experimental notebooks to production-ready APIs.
- Improved deployment reproducibility and operational reliability across end-to-end ML workflows.

Tools: Python, FastAPI, GitHub Actions, Docker, Git, Linux, CI/CD

Data Consultant | 180 Degrees Consulting Tilburg

Feb 2026 - Present | Tilburg, North Brabant, Netherlands | Hybrid

- Advised organizations on data-driven strategy and operational improvement.
- Conducted business analysis and developed analytical frameworks to support better decision-making.

Tools: Excel, Data Analysis, Business Analysis, Market Analysis, Financial Analysis

Junior Data Scientist | mih360

Jun 2025 - Apr 2026 | Remote

- Applied machine learning to industrial optimization and workforce analytics.
- Developed predictive models, statistical learning pipelines, and decision-support systems for operational use.

Tools: Python, pandas, scikit-learn, SQL, Jupyter, Git, Machine Learning, Statistical Modeling

SELECTED PROJECTS

Addressing Real-World Crime and Security Problems with Data Science

Feb 2025 - May 2025

- Processed and integrated 900K+ monthly crime records, socio-economic deciles, and GeoJSON boundaries to engineer temporal and spatial features.
- Built forecasting models and delivered an interactive dashboard and mapping tool for analysis and stakeholder engagement.

Tools: Python, pandas, NumPy, scikit-learn, LightGBM, TensorFlow/Keras, GeoPandas, Flask/Dash, SQL, Git/GitHub

University Data Challenge - X-ray ML Model

Feb 2025 - Apr 2025

- Developed a deep learning diagnostic model for chest X-ray analysis with an integrated preprocessing and augmentation pipeline.
- Evaluated model performance while balancing efficiency, ethics, and multi-class disease prediction requirements.

Tools: Python, PyTorch, scikit-learn, OpenCV, pandas, NumPy, Docker, Jupyter, Git/GitHub

University Airline Twitter Analysis

Feb 2024 - Apr 2024

- Analyzed millions of Air France tweets from regional accounts, cleaned multilingual text, and standardized data for downstream analysis.
- Stored processed data in SQLite and performed sentiment analysis to extract customer insights and evaluate support performance.

Tools: Python, pandas, SQL, SQLite, NLTK, spaCy, VADER, scikit-learn, matplotlib, Jupyter

EDUCATION

BSc in Data Science (Joint Program) | Technical University of Eindhoven & Tilburg University

2023 - 2026 | Eindhoven, Netherlands

Relevant coursework: Data Mining, NLP, Data Structures, Machine Learning, Data Analytics, Data Ethics, Visualization, Statistical Computing, Econometrics.

BSc in Computer Science and Engineering | Technical University of Eindhoven

2024 - 2027 | Eindhoven, Netherlands

Relevant coursework: Java Programming, Computer Systems, Logic and Set Theory, Discrete Mathematics, Data Structures.
